How to Access?

- To get started
  1. Log in to Infor Xtreme.
  2. Select the “Enhancement Request System” option under the Resources menu.
  3. Enter your enhancement requests.
- Product Management will review and disposition Enhancement requests periodically, and you will receive emails on any status change to Enhancements you enter or subscribe to.
- Feedback will also be gathered at local user group meetings throughout the year.
- We continue to take enhancements to the ERS, so please continue to give us your input!

Product: EAM Enterprise Edition
Module:

Description

Provide a set of screens that will show records in the archive tables of the database similar in format to the screens for the standard files.Having been on EAM/D7i for over 8 years now, archiving is going to become a necessary element of our EAM implementation. The primary reason we've not archived any data thus far is because we lose all visibility to the data after it's archived (short of developing our own set of custom grids and/or advanced reports). Having these in the
